Ray Mullin, Ph.D.

Honorary Member of the Board of Advisors

Gentlemen:

Let me say that I consider the adaptation of the video presentation series known as 'Value-Added Registration' to be a unique gem in the world of Quality and of ISO certification. Together you both have truly pioneered in an area that was long overdue for a thorough overhaul and a fresh, cost effective and value added approach. What is more, you took it directly to those very folks who stand dumbfounded smack in the middle of the road of progress. The big names have become so jaded, so fat with capricious fees for nothing but image only, so over confident, that they thought their little game would last forever and a day. No value added, scheduled milking of the herd for profit and delight, never giving a thought to the real needs of their clients - how assured they were of a steady income.

Not anymore! There is a new entity on the scene, one that delivers; one that gives value added; one that cares; one that supports their clients; one that puts back once again the big "Q" in quality, and attests to their clients own ability to prove their ISO Certification worthiness by their own years of trusted and proven manufacture; one who presents them as saying, "We say we are good and we can prove it by our own hard work and reliable products, and that is why we are endorsed by Guberman, LLC."

Now, with this series adaptation the information will be available on the Internet for all who care to know and need to know, so they can see for themselves.

As an Honorary Member of the Board of Advisors, I am very proud to be a witness to this immense and timely accomplishment!
